OBJECTIVE

To secure a challenging position as a software developer where I can apply my programming skills and technical knowledge. Seeking an opportunity to grow and contribute to innovative projects. Committed to continuous learning and professional development.

EDUCATION

Bachelor of Engineering (Computer Science) — Malla Reddy University June 2021 – May 2025
CGPA: 7.84/10

Class 12th — Sri Chaitanya Junior College June 2019 – May 2021
Percentage: 94%

Class 10th — Board of Secondary Education, Telangana — Sri Chaitanya High School June 2018 – May 2019
CGPA: 9.3/10

EXPERIENCE

Salesforce Developer Intern, Virtual Internship July 2024 – August 2024

- Completed key Salesforce Trailhead modules: Salesforce Fundamentals, Relationship & Process Automation.
- Developed skills in Apex, Testing & Debugging, and Lightning Web Components (LWC).
- Earned Super Badges in Apex Specialist, Process Automation Specialist, and Developer Super Set.
- Completed an 8-week intensive program, mastering Salesforce Trailhead modules.

SKILLS

- **Programming Languages:** Java, Python, C
- **Web Development:** HTML, CSS
- **Databases:** MySQL, MongoDB
- **Cloud Platform:** AWS
- **Others:** Network Monitoring, Docker, Kubernetes, Linux fundamentals, basic networking concepts (TCP/IP, DNS)

PROJECTS

FireGuard: Intelligent Fire Detection Using Machine Learning June 2022 – May 2023

- Developed the "FireGuard: Intelligent Fire Detection Using Machine Learning for Enhanced Surveillance" model using Convolutional Neural Networks (CNNs).
- Leveraging the power of CNNs, FireGuard strives to achieve higher accuracy and reliability in fire detection compared to conventional methods.
- This capability ensures that fire incidents are detected promptly, allowing for immediate response and mitigation measures.

Message Encode Decode in Python Using Tkinter June 2023 – May 2024

- Message Encode Decode in Python using Tkinter is a basic Python application that leverages the Tkinter GUI library to provide a user-friendly interface for encoding and decoding messages.
- The core encryption algorithm employed in this project is AES-256 (Advanced Encryption Standard with a key size of 256 bits).
- To provide a convenient and secure method for encoding and decoding messages.

ACHIEVEMENTS

- **Academic Achievements:** Won awards in Tech Quiz, Poster Presentation at college events.
- **Sports Achievements:** Organized intra-college sports events as Sports Coordinator and captained the handball team to success in college competitions.

CERTIFICATIONS

- Salesforce Developer Virtual Internship
- NPTEL – Programming in Java
- NPTEL – Data Analytics with Python
- Participated in IP Awareness/Training program under "National Intellectual Property Awareness Mission"
